# SAFETYSCOPE

## Rescue Stand-By Services

Our cost effective services will ensure compliance with Confined Space Regulation 632/05. With proven capacity and expertise, Safetyscope's highly trained teams, equipped with a wide array of equipment, are certified and accredited to solve your diverse and challenging project needs. Implementation of a successful confined space work project is dependent upon completion of the following tasks:

### Pre-Project

- Review the confined space and develop a work plan. We will assess the hazards and develop control and provide the operating expertise for the protective equipment used for the hazard control.

### Protective Equipment

- Provide the equipment to control hazards and perform retrieval if required
- Supply qualified personnel to operate the equipment
- Maintain equipment supplied during the project

### Personnel

- Two trained staff will implement the hazard Control Plan and Rescue plan if required

### Documentation

- Complete and provide necessary documentation required to work in the space

### Emergency Response

- Qualified personnel will evacuate the confined space should an incident occur. A communication plan, protocol will be set up and tested prior to entry.

### Project Reporting

- Copies of documentation will be generated at each project for Client's record keeping requirements
